

General Homework Instructions

STAT/CS 387 — Data Science II

To complete your assignments, please do the following:

1. Use the provided homework templates for write-ups. Handwritten submissions will not be accepted.
2. Complete header information (your name, the date, homework number, etc.) in the template then complete the assignment.
3. Name your write-up file (and all files) appropriately. A write-up using the same name as the template will be ignored.
4. Organize your write-ups clearly and consistently: add **sections** for each problem (labeled ‘Problem 1’, ‘Problem 2’, etc.) and **subsections** (labeled ‘Problem 1.1’, ‘Problem 1.2’, etc.) for each part of each problem.
5. Any plots or other graphics should be included in your write-up as figures. Figures should be clearly numbered (Fig. 1, Fig. 2, etc.) and captioned. Figure numbers should be used to reference your figures in writing (“See Fig. 1 for [...]”).
6. Submit on Blackboard as per any instructions specific to the particular assignment.

Any instructions specific to a particular assignment may supersede these general instructions.

Finally, it is your responsibility to be aware of these instructions and ensure your assignments satisfy these instructions. Assignments that do not satisfy instructions will be returned ungraded.
